BISHNU KUMAR SARDAR

Full-Stack Developer (MERN) | AI-Powered Web Apps | UI/UX Designer | Android Developer
+91 6363595203 | bishnusardar235@gmail.com | github.com/bishnu24ise-prog | linkedin.com/in/bishnu-kumar-sardar

PROFESSIONAL SUMMARY

Information Science student (CGPA 8.80) and full-stack developer who builds AI-powered products for real-world problems. **1st Prize**, AIdeastorm Hackathon 2026 (UnifyTalk) and **1st Runner-Up**, LUMINIX'26. Experienced across MERN, Next.js, FastAPI, Three.js and LLM integrations (Gemini, Claude), with six internships in web, application, and visual design roles.

EDUCATION

Cambridge Institute of Technology, Bangalore — B.E. Information Science & Engineering | **CGPA: 8.80** Sept 2024 – Aug 2028
Arniko College, Biratnagar, Nepal — 12th (Science Stream) 2022 – 2024
Janak Memorial Secondary Boarding School, Nepal — 10th | 91% Completed 2022

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, HTML, CSS, PHP, C
Core CS: DSA, System Design, LeetCode
Web: MERN Stack, Next.js, TypeScript, REST APIs, FastAPI, Socket.io, Prisma, Three.js / React Three Fiber, Tailwind CSS
AI, Web3 & APIs: Gemini, Claude and Groq APIs, LangChain, ChromaDB (RAG), MediaPipe, Wolfram Alpha API, Solidity, Foundry, ethers.js (Monad)
Mobile & Design: Android (Java), Figma, UI/UX, Visual Design, Content Writing
Tools & Cloud: Git/GitHub, VS Code, Postman, Vercel, Railway, Render, MongoDB Atlas, Supabase, Docker
Learning: Artificial Intelligence & Machine Learning

INTERNSHIPS & EXPERIENCE

Web Developer Intern — DevStack Technologies (Remote) June 2026 – Present
- Worked on real-world web projects with HTML, CSS, JavaScript; awarded the **Outstanding Intern Award**.

Application Developer Intern — Aethriz AI
- Built app features from requirements to working builds; integrated REST APIs and tested endpoints with Postman; Git code reviews.

Web Developer Intern — Swiftly Seva Multi Utility Private Limited
- Built responsive, cross-device interfaces with HTML, CSS, JavaScript from design requirements; fixed front-end issues.

Full Stack Developer Intern — Poiema Infotech
- Built and scaled a full-stack hackathon portal to discover, register for, and join hackathons (like Unstop / Devpost).

Visual Design Intern — InAmigos Foundation (Remote) Jan 2026 – Feb 2026
- Delivered branding assets, social media creatives, and UI designs; certified by Ministry of Corporate Affairs & NITI Aayog ARPAN.

Project-Based Intern — Skill Craft Technology
- Delivered working web features from defined requirements, improving code quality through mentor reviews.

PROJECTS

UnifyTalk — Accessible Communication Platform (AIdeastorm 2026, 1st Prize) — *React, Node.js, Express, MongoDB, Socket.io, MediaPipe, JWT* Live | GitHub
- 6-phase platform for deaf, mute, and blind users: speech-to-text, text-to-speech, 3 disability modes, 76-symbol pictogram builder, SOS alerts, real-time sign detection (MediaPipe), and Braille output.
- Owned backend, systems, and accessibility (REST APIs, JWT, real-time messaging); deployed on Vercel and Render. Team of 2.

CropIQ 2.0 — AI Smart Farming Platform — *Next.js 14, Node.js, MongoDB, Gemini, Wolfram Alpha API, PWA* Live | GitHub
- Leaf-photo disease detection (Gemini Vision), chatbot in 9 Indian languages, voice assistant, 30/60/90-day crop price forecasts, yield/fertilizer prediction, and a matcher across 12 govt. schemes.
- Secured loan and order actions with ArmorIQ intent verification and audit logging. Backend and full-stack lead, Team PixelPirates.

DebtMap — Technical Debt Visualizer — *React, TypeScript, Three.js, FastAPI, Claude AI, Celery, Redis, PostgreSQL* Live | GitHub
- Turns any GitHub repo or .zip into a navigable 3D city at 60fps (height = complexity, width = coupling, texture = test coverage).
- Claude 3.5 Sonnet refactoring engine with Monaco Editor; tree-sitter (30+ languages) analysis pipeline and Recharts dashboard. Full-stack developer and architect.

TopoForge — AI 3D Terrain Explorer — *Three.js, FastAPI, rasterio, Gemini Live API, Leaflet, Supabase* Live | GitHub
- Converts satellite tiles and GeoTIFFs into 512×512 3D terrain meshes; real-time two-way Gemini Live voice guide with exponential-backoff retries; 5 stylization presets rendered in under 0.5s.

Awaz — The Monad Super Agent — *Next.js 14, TypeScript, ethers.js, Solidity, Foundry, Groq, Hume.ai* Live | GitHub
- Voice-first Web3 agent for contract deployment, wallet actions, and trading; deployed ERC-20 contract on Monad Testnet and Mainnet with Sourcify verification; live TPS/gas monitoring.

ReceiptGuard AI — Receipt Auditing Agent — *FastAPI, React, LangChain, ChromaDB, Docker* GitHub
- Parses receipts (PDF/image), matches return/warranty policies, flags windows expiring in <7 days; deadline math in deterministic Python (not the LLM); per-shopper RAG Q&A, Pytest suite.

Task-Pilot — AI Goal-to-Plan Task Agent — *Next.js 14, Prisma, Vercel AI SDK, Groq, DnD-Kit* Live | GitHub
- Turns a goal into prioritized sub-tasks via Zod-validated output on a drag-and-drop Kanban board; cron-scheduled runs, auth, and Prisma persistence; deployed on Render.

ACHIEVEMENTS & AWARDS

- **1st Prize** — AIdeastorm Hackathon 2026 (UnifyTalk) | **1st Runner-Up** — National Level Hackathon, LUMINIX'26 (2026)
- **Global Rank 51–100** of 31,000+ builders — HackHazard's by NAMESPACE (2026) | **Outstanding Intern Award** — DevStack Technologies (June 2026)
